Cover story

Challenges and Opportunities in PEEK

Polyetherketones, PEKs, are an important family of high performance thermoplastic materials that display a unique combination of toughness, stiffness, thermos - oxidative stability, chemical and solvent resistance, flame retardancy, and retention of physical properties at high temperatures. Polyether-etherketone (PEEK) was invented by ICI in 1982 and Polyether ketone (PEK) was introduced in 1987

92

Taxation

The Important Changes in Central Excise and Service Tax in Union Budget 2016-17

Where two or more premises of the manufacturer are located in closed area within the jurisdiction of range superintendent, the manufacturing process undertaken is interlinked, the commissioner may subject to

proper accounting of moment of goods and such other conditions and limitations allow single registration for multiple units. This facility is not available to the units operating under area based exemption
