Exports to seven of top 10 destinations shrink in Oct

SHREYA NANDI
New Delhi, 16 November

Exports to seven of the top 10 destinations of India, including the US, the United Arab Emirates (UAE), and China witnessed contraction in October, leading to the country's overall outbound shipments dipping for the first time in two years, according to the data compiled by the Department of Commerce.

These 10 nations have a share of 47 per cent in India's overall exports.

The three nations that saw positive growth in exports were the Netherlands (21.6 per cent), Singapore (24.8 per cent), and Brazil (57.7 per cent). The US, which has been India's largest export market for a decade, saw a dip in its value of exports by a fourth to \$5.38 billion in October, according to the data reviewed by Business Standard.

The UAE, which signed a free trade agreement with India earlier this year, witnessed 18 per cent fall in shipments at \$1.98 billion.

Similarly, a slowdown in economic activity in China due to its zero-Covid policy and real estate market crisis resulted in 47.5 per cent degrowth in outbound shipments to the country to \$947 million.

Other countries that showed contraction during the month include Bangladesh (52.5 per cent), the UK (22 per cent), Saudi Arabia (20.4 per cent), and Hong Kong (23.6 per cent). On a cumulative basis for the April-October period, three of the top 10 export partners - China, Bangladesh, and Hong Kong - saw 37.3 per cent, 8.1 per cent, and 14.6 per cent contraction, respectively.

During the first seven months of the current financial year (2022-23), exports grew 12.6 per cent at \$263.34 billion.

Imports from three of the top 10 destinations witnessed contraction in October, the commerce department data revealed. While imports from China dipped 10 per cent, inbound shipments from the US and Australia declined 4.7 per cent and 31 per cent, respectively.

The other seven of the top 10 import partners - the UAE (1.5 per cent), Saudi Arabia (11.6 per cent), Russia (441.4 per cent), Iraq (44.1 per cent), Indonesia (46.9 per cent), Singapore (27.5 per cent), and South Korea (1.7 per cent) saw positive growth.

These 10 nations have a share of 56 per cent in India's overall imports.

The October trade data released on Tuesday showed

India's merchandise exports had contracted to their lowest levels in 20 months as fears of recession in the West started impacting shipments from the country. Domestic factors, such as a higher number of holidays during the festival month, as well as export restrictions on certain agricultural and engineering goods, also affected outbound shipments that declined 16.6 per cent in October.

Key commodity groups, such as engineering goods, gems and jewellery, organic and inorganic chemicals, and readymade garments, resulted in a sharp contraction in the overall exports.

A sharp contraction in exports is a reflection of the mounting geopolitical tension triggered by the Russia-Ukraine stand-off that started in February this year. Besides, high inflation, monetary policy tightening, currency depreciation, as well as pandemic-led supply-chain constraints, caused disruption worldwide.
