Cover Story

Inner-liner Technology for Tubeless Tires (Part-II)

The inner wall of a tubeless tires is a thin rubber liner (Fig.1) and is made of an air-impermeable rubber compound and its function is to reduce permeation of air through other tire components, very similar or comparable to inner-tubes in tube-type tyres.

IRM Report

India Rubber Meet closes at Mamallapuram

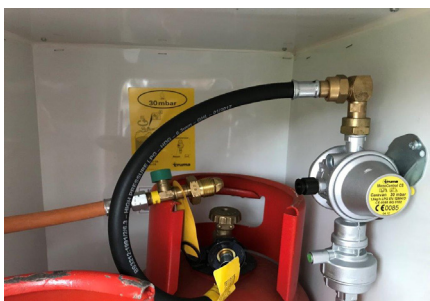

The two days rubber stakeholder meet, India Rubber Meet, held at Mamallapuram, Tamilnadu came to a close today. Mr. K.M. Mammen, Chairman, Automotive Tyre Manufacturers Association and Chairman and Managing Director of MRF Ltd inaugurated the Meet on 28 February 2020. Mr. Mammen said that resilience is the very character of rubber and the rubber sector is sure to regain its past glory, surviving the obstacles of the present recessionary trends as well as climatic variations.
