12th National Rubber Conference 2026 – Empowering Rubber Industry for the Next Decade

As global supply networks pivot toward decarbonisation, circular economy principles, and hyper-efficiency, the rubber sector stands at a dynamic tipping point.

All India Rubber Industries Association (AIRIA) Western Region is all set to hosts the flagship National Rubber Conference (NRC 2026) in the commercial pulse of Mumbai. (22-23 October, 2026 Fairmont Mumbai)

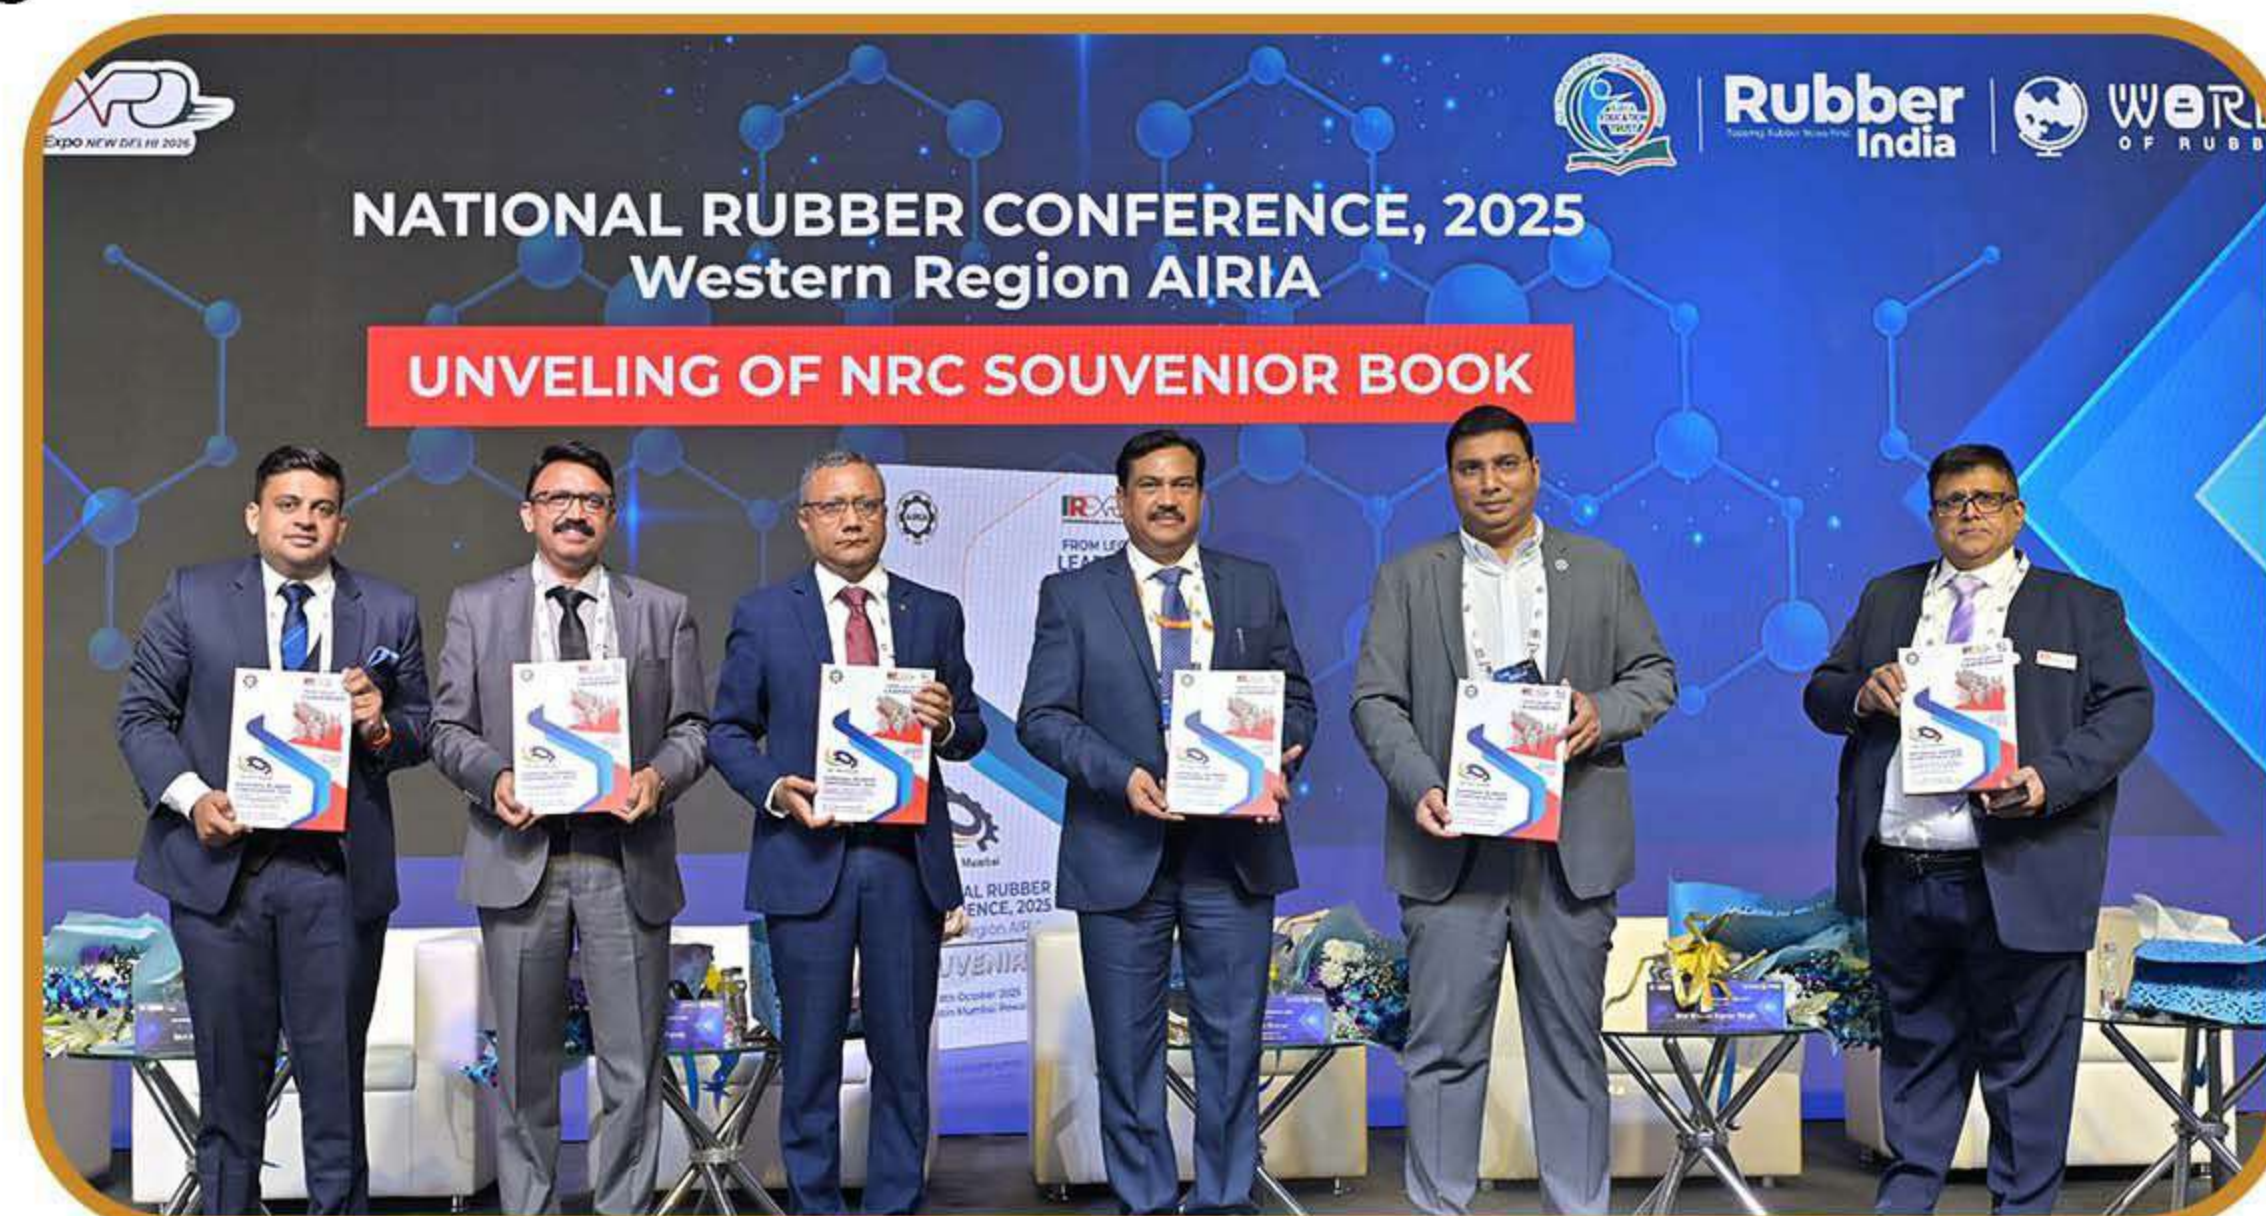

NRC 2026 is a high-octane convergence designed for rubberpreneurs, polymer scientists, MSME visionaries, and industrial disruptors coming together to chart the next generation of elastomeric manufacturing.

It is where the future of the rubber and polymer industry takes shape. At a time when technology, sustainability, geopolitics, and shifting market dynamics are redefining the industrial landscape, NRC 2026 will bring together the ideas, innovations, and industry leaders driving this transformation.

With global supply chains facing unprecedented volatility, NRC 2026 will also address market agility and business resilience, from raw material and energy pressures to trade realignments, currency risks, export opportunities, and the imperative for greater cost competitiveness.

More than a conference, NRC 2026 will be a meeting point for ideas, investment, innovation, and collaboration, connecting R&D leaders and technologists with entrepreneurs, MSMEs, manufacturers, suppliers, buyers, and global industry representatives. It is an opportunity to look beyond immediate challenges, anticipate what comes next, and transform disruption into competitive advantage. Because the future will not belong to those who simply withstand change, it will belong to those who anticipate it, innovate through it, and emerge stronger.

NRC 2026 is about building that future, together.
